

EmployeeManagement2 HRMS

Full solution explorer structure and C# class inventory for sharing with another AI module.

Generated	2026-06-06 10:21:02
Workspace	D:\projects\EmployeeManagement2
Included files	595
C# files scanned	421
Discovered C# types	433
Projects	EmployeeManagement.API, EmployeeManagement.UI

Excluded folders: .git, .vs, bin, obj, run-logs, Logs, node_modules, packages, TestResults, and wwwroot/uploads.

1. Solution Summary

Category	File Count
C# Source	11
Client Assets	34
Configuration and Project Files	7
Controllers	34
Documentation	4
MVC Views	81
Middleware	1
Models and ViewModels	286
Other	32
Repositories	41
SQL Scripts	16
Services	48

2. Project Files and Dependencies

EmployeeManagement.API

Path: EmployeeManagement.API/EmployeeManagement.API.csproj

Target frameworks: net8.0

Package references:

- BCrypt.Net-Next 4.0.3
- ClosedXML 0.105.0
- Dapper 2.1.66
- Emgu.CV 4.8.1.5350
- EPPlus 7.0.5
- Google.Apis.Auth 1.73.0
- Microsoft.AspNetCore.Authentication.JwtBearer 8.0.1
- Microsoft.AspNetCore.Authentication.OpenIdConnect 8.0.0
- Microsoft.AspNetCore.OpenApi 8.0.1
- Microsoft.Data.SqlClient 6.1.4
- Serilog.AspNetCore 10.0.0
- Swashbuckle.AspNetCore 6.5.0
- System.Data.SqlClient 4.9.1
- System.IdentityModel.Tokens.Jwt 8.15.0

EmployeeManagement.UI

Path: EmployeeManagement.UI/EmployeeManagement.UI.csproj

Target frameworks: net8.0

Package references:

- Microsoft.AspNetCore.Authentication.Facebook 7.0.0
- Microsoft.AspNetCore.Authentication.Google 7.0.0
- Microsoft.AspNetCore.Session 2.2.0
- Microsoft.Extensions.Configuration.Binder 10.0.5
- Microsoft.Extensions.Http.Polly 10.0.5
- Microsoft.VisualStudio.Web.CodeGeneration.Design 8.0.23

- Newtonsoft.Json 13.0.4
- Polly 8.6.6
- Polly.Extensions.Http 3.0.0

Project references:

- ../EmployeeManagement.API/EmployeeManagement.API.csproj

3. Solution Explorer Tree

Full included file tree, generated after excluding build/runtime noise.

4. C# Type Inventory

Each discovered C# class, interface, record, struct, or enum is listed with namespace, file, inheritance, and public/internal/protected members found by static parsing.

EmployeeManagement.API

class AuthorizePermissionAttribute (EmployeeManagement.API.Attributes)

File: EmployeeManagement.API/Attributes/AuthorizePermissionAttribute.cs

Modifiers: public

Inherits / implements: Attribute, IAuthorizationFilter

Attributes: AttributeUsage(AttributeTargets.Method | AttributeTargets.Class, AllowMultiple = true)

Constructors (1):

- public AuthorizePermissionAttribute(string permission)

Methods (1):

- public void OnAuthorization(AuthorizationFilterContext context)

class ApiResponse<T> (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/ApiResponse.cs

Modifiers: public

Properties (6):

- public DateTime Timestamp
- public List<string>? Errors
- public T? Data
- public bool Status
- public int StatusCode
- public string Message

Methods (2):

- public static ApiResponse<T> Fail(string message, List<string>? errors = null)
- public static ApiResponse<T> Success(T data, string message = "Success")

class DbHelper (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/DbHelper.cs

Modifiers: public

Constructors (1):

- public DbHelper(IConfiguration configuration)

Methods (1):

- public SqlConnection GetConnection()

class ModelStateExtensions (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/ModelStateExtensions.cs

Modifiers: public static

Methods (1):

- public static List<string> GetErrorMessages(this ModelStateDictionary modelState)

class RefreshTokenGenerator (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/RefreshTokenGenerator.cs

Modifiers: public

Methods (1):

- public static string Generate()

class SqlDataReaderExtensions (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/SqlDataReaderExtensions.cs

Modifiers: public static

Methods (8):

- public static DateTime GetDateTime(this SqlDataReader reader, string columnName)
- public static DateTime? GetNullableDateTime(this SqlDataReader reader, string columnName)
- public static bool GetBoolean(this SqlDataReader reader, string columnName)
- public static decimal GetDecimal(this SqlDataReader reader, string columnName)
- public static decimal? GetNullableDecimal(this SqlDataReader reader, string columnName)
- public static int GetInt32(this SqlDataReader reader, string columnName)
- public static int? GetNullableInt32(this SqlDataReader reader, string columnName)
- public static string? GetNullableString(this SqlDataReader reader, string columnName)

class UserDto (EmployeeManagement.API.Common)

File: EmployeeManagement.API/Common/UserDto.cs

Modifiers: public

Properties (10):

- public DateTime CreatedDate
- public DateTime? LastLoginDate
- public List<string> Roles
- public bool IsActive
- public int Id
- public string Email
- public string FirstName
- public string LastName
- public string Username
- public string? PhoneNumber

Fields (1):

- public string FullName

class AuditLogController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/AuditLogController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController; Authorize

Constructors (1):

- public AuditLogController(IAuditLogService auditLogService, ILogger<AuditLogController> logger, IConfiguration configuration)

Methods (3):

- public async Task<ActionResult<ApiResponse<AuditLog>>> GetById(int id)
- public async Task<ActionResult<ApiResponse<AuditLogResponse>>> GetLogs([FromBody] AuditLogRequest request)
- public async Task<ActionResult> Test()

class AuthController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/AuthController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController

Constructors (1):

- public AuthController(IAuthService authService, ILogger<AuthController> logger)

Methods (11):

- public ActionResult<ApiResponse<object>> GetCurrentUser()
- public async Task<ActionResult<ApiResponse<AuthResponse >>> RefreshToken([FromBody] RefreshTokenRequest request)
- public async Task<ActionResult<ApiResponse<AuthResponse >>> Register([FromBody] RegisterRequest request)
- public async Task<ActionResult<ApiResponse<AuthResponse >>> RegisterWithRole([FromBody] RegisterRequest request)
- public async Task<ActionResult<ApiResponse<AuthResponse>>> Login([FromBody] LoginRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> ForgotPassword([FromBody] ForgotPasswordRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> ResetPassword([FromBody] ResetPasswordWithTokenRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> ResetPasswordByAdmin([FromBody] ResetPasswordRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> RevokeToken([FromBody] RefreshTokenRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> ValidateResetToken([FromQuery] string token)
- public async Task<ActionResult<ApiResponse<object>>> ChangePassword([FromBody] ChangePasswordRequest request)

class DepartmentController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/DepartmentController.cs

Modifiers: public

Inherits / implements: ControllerBase

Constructors (1):

- public DepartmentController(IDepartmentRepository repo)

Methods (1):

- public async Task<IActionResult> GetAll()

class DummyUpiPaymentController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/DummyUpiPaymentController.cs

Modifiers: public

Inherits / implements: ControllerBase

Constructors (1):

- public DummyUpiPaymentController(IDummyUpiPaymentService dummyUpiService, ILogger<DummyUpiPaymentController> logger)

Methods (4):

- public IActionResult PaymentForm(string orderId, decimal amount, string upild, string txnId)
- public async Task<IActionResult> SimulateFailure(string orderId)
- public async Task<IActionResult> SimulateSuccess(string orderId)
- public async Task<IActionResult> VerifyPayment([FromBody] VerifyUpiPaymentRequest request)

class DummyUpiPaymentViewModel (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/DummyUpiPaymentController.cs

Modifiers: public

Properties (5):

- public DateTime Timestamp
- public decimal Amount
- public string OrderId
- public string TransactionId
- public string Upild

class VerifyUpiPaymentRequest (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/DummyUpiPaymentController.cs

Modifiers: public

Properties (2):

- public string OrderId
- public string UpiTransactionId

class EmployeeController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/EmployeeController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController

Constructors (1):

- public EmployeeController(IEmployeeRepository repo, IAuditService auditService, ILogger<EmployeeController> logger)

Methods (18):

- public async Task<ActionResult<ApiResponse<BulkOperationResult>>> BulkCreate([FromBody] List<EmployeeCreateRequest> requests)
- public async Task<ActionResult<ApiResponse<BulkOperationResult>>> Import(IFormFile file)
- public async Task<ActionResult<ApiResponse<Employee>>> Create([FromBody] EmployeeCreateRequest request)
- public async Task<ActionResult<ApiResponse<Employee>>> GetById(int id)
- public async Task<ActionResult<ApiResponse<Employee>>> Restore(int id)
- public async Task<ActionResult<ApiResponse<Employee>>> Update(int id, [FromBody] EmployeeUpdateRequest request)
- public async Task<ActionResult<ApiResponse<Employee>>> UpdateStatus(int id, [FromBody] StatusUpdateRequest request)
- public async Task<ActionResult<ApiResponse<List<Employee>>>> GetAll()
- public async Task<ActionResult<ApiResponse<List<Employee>>>> GetByDepartment(string department)
- public async Task<ActionResult<ApiResponse<List<Employee>>>> Search([FromQuery] string term)

- public async Task<ActionResult<ApiResponse<bool>>> Delete(int id)
- public async Task<ActionResult<ApiResponse<bool>>> DeletePhoto(int id)
- public async Task<ActionResult<ApiResponse<bool>>> HardDelete(int id)
- public async Task<ActionResult<ApiResponse<object>>> GetCount()
- public async Task<ActionResult<ApiResponse<string>>> UploadPhoto(int id, IFormFile file)
- public async Task<ActionResult> Export([FromQuery] string? department = null, [FromQuery] bool? isActive = null)
- public async Task<ActionResult> ExportCsv([FromQuery] string? department = null, [FromQuery] bool? isActive = null)

class ErrorLogsController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/ErrorLogsController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController; Authorize(Roles = "Employee.View"); Authorize(Roles = "Employee.Update")

Constructors (1):

- public ErrorLogsController(IErrorLogService errorLogService, ILogger<ErrorLogsController> logger)

Methods (5):

- public IActionResult GenerateError([FromQuery] string type = "general")
- public IActionResult TestError()
- public async Task<ActionResult<ApiResponse<ErrorLog>>> GetErrorDetails(Guid errorId)
- public async Task<ActionResult<ApiResponse<List<ErrorLog>>>> GetErrorLogs([FromQuery] int top = 100, [FromQuery] bool? isResolved = null)
- public async Task<ActionResult<ApiResponse<bool>>> MarkAsResolved(Guid errorId, [FromBody] ResolveErrorRequest request)

class HealthController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/HealthController.cs

Modifiers: public

Inherits / implements: ControllerBase

Methods (1):

- public IActionResult Get()

class LeaveController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/LeaveController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController

Constructors (1):

- public LeaveController(ILogRepository leaveRepo, IAuthService authService, IEmailService emailService, ILogger<LeaveController> logger,...)

Methods (31):

- public async Task<ActionResult<ApiResponse<AdminLeaveDashboard>>> GetAdminDashboard([FromQuery] int? year = null)
- public async Task<ActionResult<ApiResponse<Holiday>>> AddHoliday([FromBody] CreateHolidayRequest request)
- public async Task<ActionResult<ApiResponse<Holiday>>> GetHolidayById(int id)
- public async Task<ActionResult<ApiResponse<Holiday>>> UpdateHoliday(int id, [FromBody] UpdateHolidayRequest request)
- public async Task<ActionResult<ApiResponse<HolidayStats>>> GetHolidayStats([FromQuery] int? year = null)
- public async Task<ActionResult<ApiResponse<LeaveDashboardStats>>> GetDashboardStats([FromQuery] int? year = null)
- public async Task<ActionResult<ApiResponse<LeaveRequest>>> ApplyLeave([FromBody] ApplyLeaveRequest request)
- public async Task<ActionResult<ApiResponse<LeaveRequest>>> ApplyLeaveWithAttachment([FromForm] ApplyLeaveRequest request, IFormFile? attachment)
- public async Task<ActionResult<ApiResponse<LeaveRequest>>> GetLeaveRequestById(int id)
- public async Task<ActionResult<ApiResponse<LeaveType>>> GetLeaveTypeById(int id)
- public async Task<ActionResult<ApiResponse<List<DepartmentLeaveReportItem>>>> GetDepartmentLeaveReport([FromQuery] int? year = null)
- public async Task<ActionResult<ApiResponse<List<EmployeeLeaveReportItem>>>> GetEmployeeLeaveReport([FromQuery] int? year = null, [FromQuery] int? departmentId = null, [FromQuery] ...)
- public async Task<ActionResult<ApiResponse<List<Holiday>>>> GetHolidays([FromQuery] int? year = null)

- public async Task<ActionResult<ApiResponse<List<LeaveCalendarItem>>>> GetLeaveCalendar([FromQuery] int month, [FromQuery] int year, [FromQuery] int? departmentId = null)
- public async Task<ActionResult<ApiResponse<List<LeaveRequest>>>> GetLeaveHistory(int employeeId, [FromQuery] int? year = null)
- public async Task<ActionResult<ApiResponse<List<LeaveRequest>>>> GetPendingRequests([FromQuery] int? departmentId = null)
- public async Task<ActionResult<ApiResponse<List<LeaveType>>>> GetLeaveTypes()
- public async Task<ActionResult<ApiResponse<List<MonthlyLeaveReportItem>>>> GetMonthlyReport([FromQuery] int month, [FromQuery] int year, [FromQuery] int? departmentId = null)
- public async Task<ActionResult<ApiResponse<PagedResult<LeaveRequest>>>> GetAllLeaveRequests([FromQuery] string? status = null, [FromQuery] int? departmentId = null, [FromQuery] ...)
- public async Task<ActionResult<ApiResponse<bool>>> AllocateDefaultForAll([FromQuery] int year)
- public async Task<ActionResult<ApiResponse<bool>>> AllocateForSingle([FromBody] AllocateSingleEmployeeRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> AllocateLeaveBalance([FromBody] AllocateLeaveRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> ApproveLeave([FromBody] LeaveActionRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> CancelLeave([FromBody] CancelLeaveRequest request)
- public async Task<ActionResult<ApiResponse<bool>>> DeleteHoliday(int id)
- public async Task<ActionResult<ApiResponse<bool>>> RejectLeave([FromBody] LeaveActionRequest request)
- public async Task<ActionResult<ApiResponse<object>>> AllocateFixedForAll([FromBody] AllocateFixedLeaveRequest request)
- public async Task<ActionResult> ExportEmployeeReportCsv([FromQuery] int? year = null, [FromQuery] int? departmentId = null)
- public async Task<ActionResult> ExportEmployeeReportExcel([FromQuery] int? year = null, [FromQuery] int? departmentId = null)

class LoanController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/LoanController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController; Authorize

Constructors (1):

- public LoanController(ILoanService loanService, ILogger<LoanController> logger)

Methods (15):

- public async Task<ActionResult<ApiResponse<List<LoanDetailsResponse>>>>> GetEmployeeLoans(int employeeId, [FromQuery] string? status = null)
- public async Task<ActionResult<ApiResponse<List<LoanDetailsResponse>>>>> GetMyLoans([FromQuery] string? status = null)
- public async Task<ActionResult<ApiResponse<List<LoanDetailsResponse>>>>> GetPendingLoanApprovals()
- public async Task<ActionResult<ApiResponse<List<LoanEMISchedule>>>>> GetLoanEMISchedule(int loanId)
- public async Task<ActionResult<ApiResponse<List<LoanType>>>>> GetAllLoanTypes([FromQuery] bool activeOnly = true)
- public async Task<ActionResult<ApiResponse<LoanDetailsResponse>>>>> GetLoanDetails(int loanId)
- public async Task<ActionResult<ApiResponse<LoanSummaryResponse>>>>> GetLoanSummary(int employeeId)
- public async Task<ActionResult<ApiResponse<LoanSummaryResponse>>>>> GetMyLoanSummary()
- public async Task<ActionResult<ApiResponse<LoanType>>>>> GetLoanTypeById(int loanTypeId)
- public async Task<ActionResult<ApiResponse<bool>>>>> ApproveLoan(int loanId, [FromBody] ApproveLoanRequest request)
- public async Task<ActionResult<ApiResponse<bool>>>>> DisburseLoan(int loanId, [FromBody] DisburseLoanRequest request)
- public async Task<ActionResult<ApiResponse<bool>>>>> RejectLoan(int loanId, [FromBody] RejectLoanRequest request)
- public async Task<ActionResult<ApiResponse<decimal>>>>> GetMonthlyEMIDeduction(int employeeId)
- public async Task<ActionResult<ApiResponse<decimal>>>>> GetTotalLoanOutstanding(int employeeId)
- public async Task<ActionResult<ApiResponse<int>>>>> ApplyForLoan([FromForm] LoanApplicationRequest request)

class PaymentController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/PaymentController.cs

Modifiers: public

Inherits / implements: ControllerBase

Constructors (1):

- public PaymentController(IPaymentGatewayService paymentGatewayService, IPaymentRepository paymentRepository)

Methods (6):

- public async Task<ActionResult> GetEmployeePayments(int employeeId)
- public async Task<ActionResult> GetPaymentStatus(string orderId)
- public async Task<ActionResult> GetTotalPayments(int employeeId)
- public async Task<ActionResult> InitiatePayment([FromBody] PaymentRequest request)
- public async Task<ActionResult> PaymentCallback([FromBody] PaymentCallbackRequest callback)
- public async Task<ActionResult> ProcessRefund(string transactionId, [FromBody] dynamic request)

class PayrollController (EmployeeManagement.API.Controllers)

File: EmployeeManagement.API/Controllers/PayrollController.cs

Modifiers: public

Inherits / implements: ControllerBase

Attributes: ApiController; Authorize

Constructors (1):

- public PayrollController(IPayrollService payrollService, ILogger<PayrollController> logger)

Methods (14):

- public async Task<ActionResult<ApiResponse<EmployeePayrollDetailResponse>>>>> GetEmployeePayrollDetails(int cycleId, int employeeId)
- public async Task<ActionResult<ApiResponse<List<EmployeePayrollDetailResponse>>>>> GetPayrollRegister(int cycleId)
- public async Task<ActionResult<ApiResponse<List<PayrollSummaryResponse>>>>> GetPayrollCycles([FromQuery] int year)

Modifiers: public

Properties (2):

- public decimal LeavesPerType
- public int Year

class AllocateLeaveRequest (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AllocateLeaveRequest.cs

Modifiers: public

Properties (5):

- public decimal CarryForward
- public decimal TotalAllocated
- public int EmployeeId
- public int LeaveTypeId
- public int Year

class AllocateSingleEmployeeRequest (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AllocateSingleEmployeeRequest.cs

Modifiers: public

Properties (3):

- public decimal LeavesPerType
- public int EmployeeId
- public int Year

class ApplyLeaveRequest (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/ApplyLeaveRequest.cs

Modifiers: public

Properties (8):

- public DateTime EndDate
- public DateTime StartDate
- public bool IsHalfDay
- public int EmployeeId
- public int LeaveTypeId
- public string Reason
- public string? EmergencyContact
- public string? HalfDayType

class ApproveUserRequest (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/ApproveUserRequest.cs

Modifiers: public

Properties (3):

- public int RoleId
- public int UserId
- public int? DepartmentId

class AttendanceReportData (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AttendanceReportData.cs

Modifiers: public

Properties (2):

- public AttendanceReportSummary Summary
- public List<EmployeeAttendanceItem> Employees

class AttendanceReportSummary (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AttendanceReportSummary.cs

Modifiers: public

Properties (5):

- public int HolidaysInMonth
- public int ReportMonth
- public int ReportYear
- public int TotalWorkingDays
- public string MonthName

class AuditLog (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AuditLog.cs

Modifiers: public

Properties (11):

- public DateTime Timestamp

- public int Id
- public int? EntityId
- public int? UserId
- public string Action
- public string? EntityName
- public string? IpAddress
- public string? NewValues
- public string? OldValues
- public string? UserAgent
- public string? Username

class AuditLogRequest (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AuditLogRequest.cs

Modifiers: public

Properties (7):

- public DateTime? EndDate
- public DateTime? StartDate
- public int PageNumber
- public int PageSize
- public int? UserId
- public string? Action
- public string? EntityName

class AuditLogResponse (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AuditLogResponse.cs

Modifiers: public

Properties (4):

- public List<AuditLog> Logs
- public int PageNumber
- public int PageSize
- public int TotalRecords

Fields (1):

- public int TotalPages

class AuthResponse (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/AuthResponse.cs

Modifiers: public

Properties (10):

- public DateTime TokenExpiry
- public List<string> Permissions
- public List<string> Roles
- public int UserId
- public string AccessToken
- public string Email
- public string FullName
- public string RefreshToken
- public string Username
- public string? ProfilePicture

class BankFileData (EmployeeManagement.API.Models.Payroll)

File: EmployeeManagement.API/Models/BankFileData.cs

Modifiers: public

Properties (14):

- public DateTime? PaymentDate
- public decimal NetSalary
- public decimal PaymentAmount
- public int CycleId
- public int EmployeeId
- public string AccountNumber
- public string BankName
- public string EmployeeCode
- public string EmployeeName
- public string IFSCCode
- public string? CycleName
- public string? Narration
- public string? PaymentMode
- public string? ReferenceNo

class BulkOperationResult (EmployeeManagement.API.Models)

File: EmployeeManagement.API/Models/BulkOperationResult.cs

Modifiers: public

- public async Task<Payment> GetPaymentByTransactionIdAsync(string transactionId)
- public async Task<decimal> GetTotalPaymentsByEmployeeAsync(int employeeId)

class PermissionRepository (EmployeeManagement.API.Repositories)

File: EmployeeManagement.API/Repositories/PermissionRepository.cs

Modifiers: public

Inherits / implements: IPermissionRepository

Constructors (1):

- public PermissionRepository(DbHelper dbHelper)

Methods (4):

- public async Task<List<Permission>> GetAllPermissionsAsync()
- public async Task<List<Permission>> GetRolePermissionsAsync(int roleId)
- public async Task<List<Permission>> GetUserPermissionsAsync(int userId)
- public async Task<bool> CheckUserPermissionAsync(int userId, string permissionName)

class ProfileRepository (EmployeeManagement.API.Repositories)

File: EmployeeManagement.API/Repositories/ProfileRepository.cs

Modifiers: public

Inherits / implements: IProfileRepository

Constructors (1):

- public ProfileRepository(IDbConnectionFactory connectionFactory, ILogger<ProfileRepository> logger)

Methods (5):

- public async Task<List<UserActivityLog>> GetUserActivityLogAsync(int userId, int pageNumber, int pageSize)
- public async Task<List<UserSession>> GetUserSessionsAsync(int userId)
- public async Task<ProfileResponse?> GetProfileByIdAsync(int id)
- public async Task<ProfileResponse?> GetUserProfileAsync(int userId)
- public async Task<UserSettings?> GetUserSettingsAsync(int userId)

class RefreshTokenRepository (EmployeeManagement.API.Repositories)

File: EmployeeManagement.API/Repositories/RefreshTokenRepository.cs

Modifiers: public

Inherits / implements: IRefreshTokenRepository

Constructors (1):

- `public RefreshTokenRepository(IConfiguration configuration, ILogger<RefreshTokenRepository> logger)`

Methods (4):

- `public async Task RevokeAllUserTokensAsync(int userId)`
- `public async Task RevokeRefreshTokenAsync(string token, string? replacedByToken = null)`
- `public async Task<RefreshToken?> GetRefreshTokenAsync(string token)`
- `public async Task<int> SaveRefreshTokenAsync(RefreshToken refreshToken)`

class ReportRepository (EmployeeManagement.API.Repositories)

File: EmployeeManagement.API/Repositories/ReportRepository.cs

Modifiers: public

Inherits / implements: IReportRepository

Constructors (1):

- `public ReportRepository(IConfiguration config, ILogger<ReportRepository> logger)`

Methods (3):

- `public async Task<AttendanceReportData> GetAttendanceReport(int month, int year, int? departmentId, int? employeeId)`
- `public async Task<EmployeeReportData> GetEmployeeReport(int? departmentId, bool? isActive, DateTime? joiningFrom, DateTime? joiningTo, string? searchTerm)`
- `public async Task<SalaryReportData> GetSalaryReport(int? departmentId, int? month, int? year)`

class RoleRepository (EmployeeManagement.API.Repositories)

File: EmployeeManagement.API/Repositories/RoleRepository.cs

Modifiers: public

Inherits / implements: IRoleRepository

Constructors (1):

- `public RoleRepository(DbHelper dbHelper)`

Methods (5):

- `public async Task<List<Role>> GetAllRolesAsync()`
- `public async Task<List<Role>> GetUserRolesAsync(int userId)`
- `public async Task<Role?> GetRoleByIdAsync(int id)`
- `public async Task<bool> AssignRoleToUserAsync(int userId, int roleId, int assignedBy)`
- `public async Task<bool> RemoveRoleFromUserAsync(int userId, int roleId)`

- public async Task<int> RegisterAsync(RegisterRequest model)

class AuditLogService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/AuditLogService.cs

Modifiers: public

Inherits / implements: IAuditLogService

Constructors (1):

- public AuditLogService(IAuditLogRepository repository, ILogger<AuditLogService> logger)

Methods (3):

- public async Task LogAsync(string action, string? entityName = null, int? entityId = null, object? oldValues = null, object? newValues = null, int? userId...)
- public async Task<ApiResponse<AuditLog>> GetByIdAsync(int id)
- public async Task<ApiResponse<AuditLogResponse>> GetLogsAsync(AuditLogRequest request)

class AuditService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/AuditService.cs

Modifiers: public

Inherits / implements: IAuditService

Constructors (1):

- public AuditService(DbHelper dbHelper, IHttpContextAccessor httpContextAccessor, ILogger<AuditService> logger)

Methods (6):

- public async Task LogActionAsync(int? userId, string action)
- public async Task LogAsync(AuditLog log)
- public async Task LogAsync(int? userId, string action, string? tableName = null, int? recordId = null, string? oldValues = null, string? newValues = null,...)
- public async Task LogCreateAsync(int userId, string tableName, int recordId, string? newValues = null)
- public async Task LogDeleteAsync(int userId, string tableName, int recordId, string? oldValues = null)
- public async Task LogUpdateAsync(int userId, string tableName, int recordId, string? oldValues, string? newValues)

class AuthService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/AuthService.cs

Modifiers: public

Inherits / implements: IAuthService

Constructors (1):

- public AuthService(IAuthRepository authRepository, ITokenService tokenService, IPasswordService passwordService, IAuditService auditServ...)

Methods (10):

- public async Task<ApiResponse<AuthResponse>> LoginAsync(LoginRequest request, string? ipAddress)
- public async Task<ApiResponse<AuthResponse>> RefreshTokenAsync(RefreshTokenRequest request, string? ipAddress)
- public async Task<ApiResponse<AuthResponse>> RegisterAsync(RegisterRequest request, int? createdBy = null)
- public async Task<ApiResponse<bool>> ChangePasswordAsync(int userId, ChangePasswordRequest request)
- public async Task<ApiResponse<bool>> ForgotPasswordAsync(ForgotPasswordRequest request, string? ipAddress = null, string? userAgent = null)
- public async Task<ApiResponse<bool>> ResetPasswordByAdminAsync(ResetPasswordRequest request, int adminUserId)
- public async Task<ApiResponse<bool>> ResetPasswordWithTokenAsync(ResetPasswordWithTokenRequest request)
- public async Task<ApiResponse<bool>> RevokeTokenAsync(string token, string? ipAddress)
- public async Task<ApiResponse<bool>> ValidatePasswordResetTokenAsync(string token)
- public async Task<bool> CheckPermissionAsync(int userId, string permissionName)

class CacheService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/CacheService.cs

Modifiers: public

Inherits / implements: ICacheService

Constructors (1):

- public CacheService(IMemoryCache cache)

Methods (2):

- public void Remove(string key)
- public void RemoveByPrefix(string prefix)

class DummyUpiPaymentService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/DummyUpiPaymentService.cs

Modifiers: public

Inherits / implements: IDummyUpiPaymentService

Constructors (1):

- public DummyUpiPaymentService(IPaymentRepository paymentRepository, ILogger<DummyUpiPaymentService> logger, IConfiguration configuration)

Methods (3):

- public async Task<PaymentResponse> InitiateUpiPaymentAsync(PaymentRequest request)
- public async Task<PaymentResponse> SimulateUpiPaymentAsync(string orderId, bool success = true)
- public async Task<PaymentResponse> VerifyUpiPaymentAsync(string orderId, string upiTransactionId)

class EmailService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/EmailService.cs

Modifiers: public

Inherits / implements: IEmailService

Constructors (1):

- public EmailService(IOptions<EmailSettings> emailSettings, ILogger<EmailService> logger)

Methods (7):

- public async Task SendLeaveAppliedNotification(string managerEmail, string employeeName, string leaveType, DateTime startDate, DateTime endDate, decimal totalDays, string reason)
- public async Task SendLeaveApprovedNotification(string employeeEmail, string employeeName, string leaveType, DateTime startDate, DateTime endDate, decimal totalDays, string? r...)
- public async Task SendLeaveCancelledNotification(string managerEmail, string employeeName, string leaveType, DateTime startDate, DateTime endDate, string? cancelReason)
- public async Task SendLeaveRejectedNotification(string employeeEmail, string employeeName, string leaveType, DateTime startDate, DateTime endDate, string? remarks)
- public async Task<bool> SendEmailAsync(string toEmail, string subject, string htmlBody)
- public async Task<bool> SendPasswordChangedNotificationAsync(string toEmail, string userName)
- public async Task<bool> SendPasswordResetEmailAsync(string toEmail, string userName, string resetLink)

class ErrorLogService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/ErrorLogService.cs

Modifiers: public

Inherits / implements: IErrorLogService

Constructors (1):

- public ErrorLogService(IDbConnectionFactory connectionFactory, ILogger<ErrorLogService> logger, IConfiguration configuration, IWebHostEnviro...)

Methods (5):

- public async Task<ErrorLog?> GetErrorDetailsAsync(Guid errorId)
- public async Task<Guid> LogErrorAsync(ErrorLog errorLog)
- public async Task<Guid> LogErrorAsync(Exception exception, HttpContext httpContext, int? userId = null, string? username = null)
- public async Task<List<ErrorLog>> GetErrorLogsAsync(int top = 100, bool? isResolved = null)
- public async Task<bool> MarkAsResolvedAsync(Guid errorId, int resolvedBy, string? notes = null)

class ExcelService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/ExcelService.cs

Modifiers: public

Inherits / implements: IExcelService

Constructors (1):

- public ExcelService(IStudentRepository studentRepo, IStudentIdGenerator idGenerator, IFileUploadService fileService, ILogger<ExcelService...>)

Methods (3):

- public async Task<BulkOperationResult> ProcessExcelFileAsync(IFormFile file, int uploadedBy)
- public async Task<byte[]> ExportStudentsToExcelAsync(List<Student> students)
- public async Task<byte[]> GenerateTemplateAsync()

class FileUploadService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/FileUploadService.cs

Modifiers: public

Inherits / implements: IFileUploadService

Constructors (1):

- public FileUploadService(IConfiguration config, ILogger<FileUploadService> logger)

Methods (5):

- public async Task<bool> DeleteFileAsync(string filePath)
- public async Task<string> SaveBase64ImageAsync(string base64String, string studentId)
- public async Task<string> SaveStudentPhotoAsync(IFormFile file, string studentId)
- public bool IsValidImageFile(IFormFile file)
- public string GetFileExtension(string fileName)

class JwtTokenService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/JwtService.cs

Modifiers: public

Inherits / implements: IJwtTokenService

Constructors (1):

- public JwtTokenService(IConfiguration config)

Methods (1):

- public string GenerateToken(UserModel user, List<string> roles)

class LoanService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/LoanService.cs

Modifiers: public

Inherits / implements: ILoanService

Constructors (1):

- public LoanService(ILoanRepository loanRepository, IAuthService authService, ILogger<LoanService> logger)

Methods (13):

- public async Task<ApiResponse<List<LoanDetailsResponse>>>> GetEmployeeLoansAsync(int employeeId, string? status = null)
- public async Task<ApiResponse<List<LoanDetailsResponse>>>> GetPendingLoanApprovalsAsync()
- public async Task<ApiResponse<List<LoanEMISchedule>>>> GetLoanEMIScheduleAsync(int loanId)
- public async Task<ApiResponse<List<LoanType>>>> GetAllLoanTypesAsync(bool activeOnly = true)
- public async Task<ApiResponse<LoanDetailsResponse>>> GetLoanDetailsAsync(int loanId)
- public async Task<ApiResponse<LoanSummaryResponse>>> GetLoanSummaryAsync(int employeeId)
- public async Task<ApiResponse<LoanType>>> GetLoanTypeByIdAsync(int loanTypeId)
- public async Task<ApiResponse<bool>>> ApproveLoanAsync(ApproveLoanRequest request, int userId)
- public async Task<ApiResponse<bool>>> DisburseLoanAsync(int loanId, DateTime disbursementDate, string mode, string? referenceNo, int userId)
- public async Task<ApiResponse<bool>>> RejectLoanAsync(int loanId, string reason, int userId)

- public async Task<ApiResponse<decimal>> GetMonthlyEMIDeductionAsync(int employeeId)
- public async Task<ApiResponse<decimal>> GetTotalLoanOutstandingAsync(int employeeId)
- public async Task<ApiResponse<int>> ApplyForLoanAsync(LoanApplicationRequest request, int userId)

class PasswordService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/PasswordService.cs

Modifiers: public

Inherits / implements: IPasswordService

Methods (1):

- public bool VerifyPassword(string password, string hash, string salt)

class PaymentGatewayService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/PaymentGatewayService.cs

Modifiers: public

Inherits / implements: IPaymentGatewayService

Constructors (1):

- public PaymentGatewayService(IConfiguration configuration, HttpClient httpClient, IPaymentRepository paymentRepository, IDummyUpiPaymentService du...)

Methods (4):

- public async Task<PaymentResponse> GetPaymentStatusAsync(string orderId)
- public async Task<PaymentResponse> InitiatePaymentAsync(PaymentRequest request)
- public async Task<PaymentResponse> ProcessRefundAsync(string transactionId, decimal amount)
- public async Task<bool> VerifyPaymentSignatureAsync(PaymentCallbackRequest callback)

class PayrollService (EmployeeManagement.API.Services.Implementation)

File: EmployeeManagement.API/services/PayrollService.cs

Modifiers: public

Inherits / implements: IPayrollService

Constructors (1):

- public PayrollService(IPayrollRepository payrollRepository, ILoanRepository loanRepository, IAuditService auditService, ILogger<PayrollServ...)

Methods (20):

- public Task<ApiResponse<StatutoryComplianceResponse>> GetStatutoryComplianceReportAsync(int month, int year)
- public async Task<ApiResponse<BankTransferResponse>> GetBankTransferReportAsync(int cycleId)
- public async Task<ApiResponse<DepartmentWiseSalaryResponse>> GetDepartmentWiseSalaryReportAsync(int cycleId)
- public async Task<ApiResponse<EmployeePayrollDetailResponse>> GetEmployeePayrollDetailsAsync(int cycleId, int employeeId)
- public async Task<ApiResponse<List<EmployeePayrollDetailResponse>>> GetPayrollRegisterAsync(int cycleId)
- public async Task<ApiResponse<List<PayrollArrears>>> GetPendingArrearsAsync(int? employeeId = null)
- public async Task<ApiResponse<List<PayrollSummaryResponse>>> GetPayrollCyclesAsync(int year)
- public async Task<ApiResponse<PayrollDashboardResponse>> GetPayrollDashboardAsync()
- public async Task<ApiResponse<PayrollRegisterResponse>> GetPayrollRegisterReportAsync(int cycleId)
- public async Task<ApiResponse<PayrollSummaryResponse>> GetPayrollSummaryAsync(int cycleId)
- public async Task<ApiResponse<bool>> ApprovePayrollCycleAsync(int cycleId, int userId, string? remarks)
- public async Task<ApiResponse<bool>> CalculateArrearsAsync(int employeeId, int newStructureId, DateTime revisionDate, int userId)
- public async Task<ApiResponse<bool>> HoldPayrollAsync(int processingId, string reason, int userId)
- public async Task<ApiResponse<bool>> LockPayrollCycleAsync(int cycleId, int userId)
- public async Task<ApiResponse<bool>> MarkPayrollAsPaidAsync(int processingId, string paymentMode, string? referenceNo, int userId)
- public async Task<ApiResponse<bool>> ProcessBulkPayrollAsync(ProcessPayrollRequest request, int userId)
- public async Task<ApiResponse<bool>> RecalculatePayrollAsync(int processingId, int userId)
- public async Task<ApiResponse<bool>> ReleasePayrollAsync(int processingId, int userId)
- public async Task<ApiResponse<int>> CreatePayrollCycleAsync(int month, int year, int createdBy)
- public async Task<ApiResponse<int>> ProcessSingleEmployeePayrollAsync(ProcessSingleEmployeePayrollRequest request, int userId)

class ProfileService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/ProfileService.cs

Modifiers: public

Inherits / implements: IProfileService

Constructors (1):

- public ProfileService(IPProfileRepository profileRepository, ILogger<ProfileService> logger, IWebHostEnvironment environment)

Methods (9):

- public async Task<ApiResponse<List<UserActivityLog>>> GetActivityLogAsync(int userId, int pageNumber = 1, int pageSize = 10)
- public async Task<ApiResponse<List<UserSession>>> GetActiveSessionsAsync(int userId)
- public async Task<ApiResponse<ProfileResponse>> GetProfileAsync(int userId)
- public async Task<ApiResponse<ProfileResponse>> GetProfileByIdAsync(int id)
- public async Task<ApiResponse<ProfileResponse>> UpdateProfileAsync(int userId, UpdateProfileRequest request)
- public async Task<ApiResponse<UserSettings>> GetSettingsAsync(int userId)
- public async Task<ApiResponse<bool>> RevokeSessionAsync(int userId, string sessionToken)
- public async Task<ApiResponse<bool>> UpdateSettingsAsync(int userId, UpdateUserSettingsRequest request)
- public async Task<ApiResponse<string>> UploadProfilePictureAsync(int userId, IFormFile file)

class SalarySlipService (EmployeeManagement.API.Services.Implementation)

File: EmployeeManagement.API/services/SalarySlipService.cs

Modifiers: public

Inherits / implements: ISalarySlipService

Constructors (1):

- public SalarySlipService(IPayrollRepository payrollRepository, IEmailService emailService, IConfiguration configuration, ILogger<SalarySlipSer...)

Methods (8):

- public ApiResponse<string> GetReportUrl(int slipId)
- public Task<ApiResponse<bool>> TrackDownloadAsync(int slipId)
- public Task<ApiResponse<bool>> TrackViewAsync(int slipId)
- public async Task<ApiResponse<List<SalarySlipResponse>>> GetEmployeeSalarySlipsAsync(int employeeId, int? year, int? month)
- public async Task<ApiResponse<SalarySlipResponse>> GetSalarySlipAsync(int slipId)
- public async Task<ApiResponse<bool>> GenerateSalarySlipsAsync(GenerateSalarySlipRequest request, int generatedBy)
- public async Task<ApiResponse<bool>> SendBulkSalarySlipEmailAsync(SendBulkSalarySlipEmailRequest request)
- public async Task<ApiResponse<bool>> SendSalarySlipEmailAsync(SendSalarySlipEmailRequest request)

class SalaryStructureService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/SalaryStructureService.cs

Modifiers: public

Inherits / implements: ISalaryStructureService

Constructors (1):

- public SalaryStructureService(ISalaryStructureRepository salaryStructureRepository, IAuditService auditService, ILogger<SalaryStructureService> log...

Methods (14):

- public async Task<ApiResponse<List<SalaryComponent>>> GetAllSalaryComponentsAsync(bool activeOnly = true)
- public async Task<ApiResponse<List<SalaryStructureResponse>>> GetEmployeeSalaryHistoryAsync(int employeeId)
- public async Task<ApiResponse<List<SalaryTemplate>>> GetAllTemplatesAsync(bool activeOnly = true)
- public async Task<ApiResponse<List<SalaryTemplateComponent>>> GetTemplateComponentsAsync(int templateId)
- public async Task<ApiResponse<SalaryComponent>> GetSalaryComponentByIdAsync(int componentId)
- public async Task<ApiResponse<SalaryStructureResponse>> GetEmployeeCurrentSalaryAsync(int employeeId)
- public async Task<ApiResponse<SalaryStructureResponse>> GetSalaryStructureDetailsAsync(int structureId)
- public async Task<ApiResponse<SalaryTemplate>> GetTemplateByIdAsync(int templateId)
- public async Task<ApiResponse<bool>> BulkAssignSalaryAsync(List<int> employeeIds, int templateId, DateTime effectiveFrom, int userId)

- public async Task<ApiResponse<bool>> DeleteSalaryComponentAsync(int componentId, int userId)
- public async Task<ApiResponse<bool>> UpdateSalaryComponentAsync(SalaryComponent component, int userId)
- public async Task<ApiResponse<bool>> UpdateSalaryComponentAsync(int componentId, decimal amount, int userId)
- public async Task<ApiResponse<int>> AssignSalaryToEmployeeAsync(AssignSalaryRequest request, int userId)
- public async Task<ApiResponse<int>> CreateSalaryComponentAsync(SalaryComponent component, int userId)

class StudentService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/StudentService.cs

Modifiers: public

Inherits / implements: IStudentService

Methods (1):

- public async Task UpdateStudentPhotoAsync(int studentId, string photoPath)

class TokenGenerationService (EmployeeManagement.API.services)

File: EmployeeManagement.API/services/TokenGenerationService.cs

Modifiers: public

Inherits / implements: ITokenGenerationService

Constructors (1):

- public TokenGenerationService(IConfiguration configuration, ILogger<TokenGenerationService> logger)

Methods (4):

- public DateTime GetAccessTokenExpiration()
- public DateTime GetRefreshTokenExpiration()
- public string GenerateAccessToken(User user)
- public string GenerateRefreshToken()

class TokenService (EmployeeManagement.API.Services)

File: EmployeeManagement.API/services/TokenService .cs

Modifiers: public

Inherits / implements: ITokenService

Constructors (1):

- public TokenService(IConfiguration configuration, ILogger<TokenService> logger)

Methods (5):

- public ClaimsPrincipal? GetPrincipalFromExpiredToken(string token)
- public DateTime GetAccessTokenExpiry()
- public DateTime GetRefreshTokenExpiry()
- public string GenerateAccessToken(User user, List<Role> roles, List<Permission> permissions)
- public string GenerateRefreshToken()

EmployeeManagement.UI

class AccountController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/AccountController.cs

Modifiers: public

Inherits / implements: Controller

Constructors (1):

- public AccountController(IApiService apiService, ILogger<AccountController> logger, IHttpClientFactory httpClientFactory, IConfiguration confi...)

Methods (21):

- public IActionResult AccessDenied()
- public IActionResult ChangePassword()
- public IActionResult ForgotPassword()
- public IActionResult ForgotPasswordConfirmation()

- public IActionResult Login(string? returnUrl = null)
- public IActionResult Register()
- public IActionResult ResetPasswordConfirmation()
- public async Task<IActionResult> AdminResetPassword(AdminResetPasswordViewModel model)
- public async Task<IActionResult> AdminResetPassword(int userId)
- public async Task<IActionResult> ChangePassword(ChangePasswordViewModel model)
- public async Task<IActionResult> EditProfile(ProfileViewModel model)
- public async Task<IActionResult> EditProfile(int id)
- public async Task<IActionResult> ForgotPassword(ForgotPasswordViewModel model)
- public async Task<IActionResult> Login(LoginRequest model, string? returnUrl = null)
- public async Task<IActionResult> Logout()
- public async Task<IActionResult> Profile()
- public async Task<IActionResult> RefreshToken()
- public async Task<IActionResult> Register(RegisterModel model)
- public async Task<IActionResult> ResetPassword(ResetPasswordViewModel model)
- public async Task<IActionResult> ResetPassword(string? token, string? email)
- public async Task<IActionResult> UploadProfilePicture(IFormFile file)

class AuditLogController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/AuditLogController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize(Roles = "Admin")

Constructors (1):

- public AuditLogController(IHttpClientFactory factory, ILogger<AuditLogController> logger, IConfiguration config, IMemoryCache cache)

Methods (6):

- public async Task<IActionResult> Details(int id)
- public async Task<IActionResult> ExportCsv(AuditLogFilterViewModel filter)
- public async Task<IActionResult> GetUserDetails(int id)
- public async Task<IActionResult> Index(AuditLogFilterViewModel filter)
- public async Task<IActionResult> Statistics(int? days = 30)
- public async Task<IActionResult> Timeline(int? days = 7)

class BaseController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/BaseController.cs

Modifiers: public

Inherits / implements: Controller

Methods (2):

- protected IActionResult RedirectToLogin()
- protected bool IsLoggedIn()

class DiagnosticsController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/DiagnosticsController.cs

Modifiers: public

Inherits / implements: Controller

Constructors (1):

- public DiagnosticsController(ILogger<DiagnosticsController> logger, IHttpClientFactory httpClientFactory, IConfiguration configuration, IWebHostEn...)

Methods (4):

- public IActionResult ClearCache()
- public IActionResult ClearSession()

- public IActionResult Index()
- public async Task<IActionResult> GetDiagnostics()

class EmployeeController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/EmployeeController.cs

Modifiers: public

Inherits / implements: Controller

Constructors (1):

- public EmployeeController(IHttpClientFactory factory, ILogger<EmployeeController> logger)

Methods (8):

- public async Task<IActionResult> Create()
- public async Task<IActionResult> Create(EmployeeViewModel model)
- public async Task<IActionResult> Delete(int id)
- public async Task<IActionResult> DeleteConfirmed(int id)
- public async Task<IActionResult> Edit(EmployeeViewModel model)
- public async Task<IActionResult> Edit(int id)
- public async Task<IActionResult> GetEmployees()
- public async Task<IActionResult> Index()

class HomeController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/HomeController.cs

Modifiers: public

Inherits / implements: Controller

Methods (1):

- public IActionResult Index()

class LeaveController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/LeaveController.cs

Modifiers: public

Inherits / implements: Controller

Constructors (1):

- public LeaveController(IHttpClientFactory factory, ILogger<LeaveController> logger, IConfiguration config, IMemoryCache cache)

Methods (23):

- public async Task<IActionResult> AddHoliday(CreateHolidayViewModel model)
- public async Task<IActionResult> AdminDashboard(int? year = null)
- public async Task<IActionResult> AllocateToAll(int year, decimal leavesPerType)
- public async Task<IActionResult> AllocateToEmployee(int employeeId, int year, decimal leavesPerType)
- public async Task<IActionResult> Apply(int? leaveTypeId = null)
- public async Task<IActionResult> ApplyPost(ApplyLeaveViewModel model)
- public async Task<IActionResult> Approve(int leaveRequestId, string? remarks)
- public async Task<IActionResult> Balance()
- public async Task<IActionResult> Calendar(int? month = null, int? year = null, int? departmentId = null)
- public async Task<IActionResult> Cancel(int leaveRequestId, string? cancelReason)
- public async Task<IActionResult> DeleteHoliday(int id, int year)
- public async Task<IActionResult> EditHoliday(EditHolidayViewModel model)
- public async Task<IActionResult> ExportCsv(int? year = null, int? departmentId = null)
- public async Task<IActionResult> ExportExcel(int? year = null, int? departmentId = null)
- public async Task<IActionResult> History(int? year = null)
- public async Task<IActionResult> Holidays(int? year = null)
- public async Task<IActionResult> Index()

- public async Task<ActionResult> ManageAllocation(int? year = null)
- public async Task<ActionResult> PendingApprovals()
- public async Task<ActionResult> PreviewAttachment(string filePath)
- public async Task<ActionResult> Reject(int leaveRequestId, string? remarks)
- public async Task<ActionResult> Reports(int? year = null, int? departmentId = null, int? month = null)
- public async Task<ActionResult> ViewAttachment(string filePath)

class PaymentController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/PaymentController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize

Constructors (1):

- public PaymentController(IPaymentService paymentService, ILogger<PaymentController> logger)

Methods (5):

- public IActionResult Failure(string orderId)
- public IActionResult InitiatePayment(int? employeeId)
- public async Task<ActionResult> Index(int employeeId)
- public async Task<ActionResult> InitiatePayment(PaymentRequest request)
- public async Task<ActionResult> Success(string orderId)

class PayrollController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/PayrollController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize(Roles = "Admin,HR,Manager")

Constructors (1):

- public PayrollController(IApiService apiService, ILogger<PayrollController> logger)

Methods (15):

- public IActionResult CreateCycle()
- public async Task<ActionResult> ApprovePayroll(int cycleId, string remarks = "")
- public async Task<ActionResult> CreateCycle(int month, int year)
- public async Task<ActionResult> CycleSummary(int cycleId)
- public async Task<ActionResult> Cycles(int year = 0)
- public async Task<ActionResult> DownloadBankTransferFile(int cycleId, string format = "Excel")
- public async Task<ActionResult> DownloadPayrollRegisterExcel(int cycleId)
- public async Task<ActionResult> EmployeePayrollDetails(int cycleId, int employeeId)

- public async Task<ActionResult> GenerateSalarySlips(int cycleId)
- public async Task<ActionResult> GetSlipSummary(int slipId)
- public async Task<ActionResult> MySalarySlips(int? year = null, int? month = null)
- public async Task<ActionResult> SalarySlipList(int cycleId, int? departmentId = null)
- public async Task<ActionResult> SendSalarySlipsEmail(int cycleId, List<int>? slipIds = null)
- public async Task<ActionResult> ViewSSRSSSalarySlip(int slipId)
- public async Task<ActionResult> ViewSalarySlip(int slipId)

class SendBulkSalarySlipEmailRequest (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/SalarySlipController.cs

Modifiers: public

Properties (3):

- public List<int>? SlipIds
- public bool SendToAll
- public int CycleId

class SalaryStructureController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/SalaryStructureController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize(Roles = "Admin,HR")

Constructors (1):

- public SalaryStructureController(IApiService apiService, ILogger<SalaryStructureController> logger)

Methods (14):

- public IActionResult CreateComponent()
- public async Task<ActionResult> AssignSalary(AssignSalaryRequest request)
- public async Task<ActionResult> AssignSalary(int employeeId = 0)
- public async Task<ActionResult> BulkAssignSalary()
- public async Task<ActionResult> BulkAssignSalary(BulkSalaryAssignRequest request)
- public async Task<ActionResult> Components(bool activeOnly = true)
- public async Task<ActionResult> CreateComponent(SalaryComponent component)

- public async Task<ActionResult> DeleteComponent(int componentId)
- public async Task<ActionResult> EditComponent(int componentId)
- public async Task<ActionResult> EditComponent(int componentId, SalaryComponent component)
- public async Task<ActionResult> SalaryHistory(int employeeId)
- public async Task<ActionResult> TemplateDetails(int templateId)
- public async Task<ActionResult> Templates(bool activeOnly = true)
- public async Task<ActionResult> ViewEmployeeSalary(int employeeId)

class StudentController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/StudentController.cs

Modifiers: public

Inherits / implements: Controller

Constructors (1):

- public StudentController(IHttpClientFactory factory, ILogger<StudentController> logger, IWebHostEnvironment webHostEnvironment)

Methods (9):

- public IActionResult UploadExcel()
- public IActionResult UploadedRecords()
- public async Task<ActionResult> Delete(int id)
- public async Task<ActionResult> DeleteConfirmed(int id)
- public async Task<ActionResult> Details(int id)
- public async Task<ActionResult> DownloadTemplate()
- public async Task<ActionResult> ExportToExcel(string? className = null, string? status = null, string? search = null)
- public async Task<ActionResult> Index()
- public async Task<ActionResult> UploadExcel(IFormFile file)

class TicketController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/TicketController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize

Constructors (1):

- public TicketController(IHttpClientFactory factory, ILogger<TicketController> logger)

Methods (20):

- public async Task<ActionResult> AddComment(int ticketId, string comment)
- public async Task<ActionResult> Assign(int ticketId, int assignedTo, string? remarks)
- public async Task<ActionResult> Block(int id, string? remarks)
- public async Task<ActionResult> Close(int id, string? remarks)
- public async Task<ActionResult> Create()
- public async Task<ActionResult> Create(string title, string description, string ticketType, string priority, int? assignedTo, DateTime? dueDate, string? stepsToReprod...)
- public async Task<ActionResult> Delete(int id)
- public async Task<ActionResult> DeleteAttachment(int attachmentId, int ticketId)
- public async Task<ActionResult> Details(int id)
- public async Task<ActionResult> DownloadAttachment(int attachmentId)
- public async Task<ActionResult> Edit(int id)
- public async Task<ActionResult> Edit(int ticketId, string title, string description, string ticketType, string priority, DateTime? dueDate, string? stepsToReproduce...)
- public async Task<ActionResult> InProgress(int id)
- public async Task<ActionResult> Index()
- public async Task<ActionResult> List(string? status = null, string? priority = null, string? ticketType = null, string? searchTerm = null, int pageNumber = 1)
- public async Task<ActionResult> MyTickets(string? status = null)

- public async Task<ActionResult> Reopen(int id, string? remarks)
- public async Task<ActionResult> Resolve(int id, string? remarks)
- public async Task<ActionResult> UpdateStatus(int ticketId, string newStatus, string? remarks)
- public async Task<ActionResult> UploadAttachment(int ticketId, IFormFile file)

class UserManagementController (EmployeeManagement.UI.Controllers)

File: EmployeeManagement.UI/Controllers/UserManagementController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize(Roles = "Admin")

Constructors (1):

- public UserManagementController(IHttpClientFactory factory, ILogger<UserManagementController> logger)

Methods (3):

- public async Task<ActionResult> ApproveUser(int userId, int roleId, int? departmentId)
- public async Task<ActionResult> Index()
- public async Task<ActionResult> RejectUser(int userId, string? rejectionReason)

class AuthorizePermissionSessionAttribute (EmployeeManagement.UI.Filters)

File: EmployeeManagement.UI/Filters/AuthorizeSessionAttribute.cs

Modifiers: public

Inherits / implements: ActionFilterAttribute

Constructors (1):

- public AuthorizePermissionSessionAttribute(params string[] permissions)

Methods (1):

- public override void OnActionExecuting(ActionExecutingContext context)

class AuthorizeSessionAttribute (EmployeeManagement.UI.Filters)

File: EmployeeManagement.UI/Filters/AuthorizeSessionAttribute.cs

Modifiers: public

Inherits / implements: ActionFilterAttribute

Constructors (1):

- public AuthorizeSessionAttribute(params string[] roles)

Methods (1):

- public override void OnActionExecuting(ActionExecutingContext context)

class AdminResetPasswordViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/AdminResetPasswordViewModel.cs

Modifiers: public

Properties (6):

- public bool SendEmailNotification
- public int UserId
- public string ConfirmPassword
- public string NewPassword
- public string? Email
- public string? Username

class ApiEndpointResult (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ApiEndpointResult.cs

Modifiers: public

Properties (12):

- public bool IsSuccess

- public int StatusCode
- public int? RecordCount
- public long ResponseSizeBytes
- public long ResponseTimeMs
- public string Category
- public string ContentType
- public string Method
- public string Name
- public string ResponseSize
- public string Url
- public string? Error

class ApiEndpointTest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ApiEndpointTest.cs

Modifiers: public

Properties (5):

- public bool RequiresAuth
- public string Category
- public string Method
- public string Name
- public string Url

Constructors (1):

- public ApiEndpointTest(string name, string method, string url, string category, bool requiresAuth)

class ApiResponse<T> (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ApiResponse.cs

Modifiers: public

Properties (6):

- public DateTime Timestamp
- public List<string>? Errors
- public T? Data
- public bool Status
- public int StatusCode
- public string Message

Methods (2):

- public static ApiResponse<T> Fail(string message, List<string>? errors = null)
- public static ApiResponse<T> Success(T data, string message = "Success")

class AssignSalaryRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/AssignSalaryRequest.cs

Modifiers: public

Properties (6):

- public DateTime EffectiveDate
- public decimal CTC
- public decimal GrossSalary
- public decimal NetSalary
- public int EmployeeId
- public int? TemplateId

class AuthResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/AuthResponse.cs

Modifiers: public

Properties (10):

- public DateTime TokenExpiry
- public List<string> Permissions
- public List<string> Roles
- public int UserId
- public string AccessToken
- public string Email
- public string FullName
- public string RefreshToken
- public string Username
- public string? ProfilePicture

class BenchmarkResult (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/BenchmarkResult.cs

Modifiers: public

Properties (9):

- public bool Success
- public double AverageTimeMs
- public int Iterations
- public int SuccessCount
- public long MaxTimeMs
- public long MinTimeMs
- public string Name
- public string Rating
- public string Url

class BulkOperationResult (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/BulkOperationResult.cs

Modifiers: public

Properties (5):

- public List<Student> InsertedStudents
- public List<string> Errors
- public int FailedCount
- public int SuccessCount
- public int TotalRecords

class BulkSalaryAssignRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/BulkSalaryAssignRequest.cs

Modifiers: public

Properties (3):

- public DateTime EffectiveDate
- public List<int> EmployeeIds
- public int TemplateId

class CacheBenchmarkResult (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/CacheBenchmarkResult.cs

Modifiers: public

Properties (6):

- public bool IsCacheEffective
- public double ImprovementPercent
- public long ColdTimeMs
- public long WarmTimeMs
- public string Name
- public string Url

class ChangePasswordViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ChangePasswordViewModel.cs

Modifiers: public

Properties (3):

- public string ConfirmNewPassword
- public string CurrentPassword
- public string NewPassword

class ClaimTypesCustom (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ClaimTypesCustom.cs

Modifiers: public static

Fields (1):

- public const string Permission

class Employee (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/Employee.cs

Modifiers: public

Properties (5):

- public decimal Salary
- public int Id
- public string Department
- public string Email
- public string Name

class EmployeeListResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/EmployeeListResponse.cs

Modifiers: public

Properties (5):

- public int Id
- public string CurrentTemplate
- public string DepartmentName
- public string EmployeeCode
- public string FullName

class ErrorLogger

File: EmployeeManagement.UI/Models/ErrorLogger.cs

Modifiers: public static

Methods (2):

- public static void Log(Exception ex)
- public static void Log(string message)

class ForgotPasswordViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ForgotPasswordViewModel.cs

Modifiers: public

Properties (1):

- public string Email

class GenerateSalarySlipRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/GenerateSalarySlipRequest.cs

Modifiers: public

Properties (1):

- public int PayrollCycleId

class LoginModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/LoginModel.cs

Modifiers: public

Properties (2):

- public string Email
- public string Password

class LoginRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/LoginRequest.cs

Modifiers: public

Properties (3):

- public bool RememberMe
- public string Password
- public string UsernameOrEmail

class Payment (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/Payment.cs

Modifiers: public

Properties (11):

- public DateTime CreatedDate
- public DateTime? CompletedDate
- public decimal Amount
- public int EmployeeId
- public int Id
- public string Currency
- public string Description
- public string OrderId
- public string PaymentMethod
- public string PaymentStatus
- public string TransactionId

class PaymentRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/PaymentRequest.cs

Modifiers: public

Properties (14):

- public decimal Amount
- public int EmployeeId
- public string AccountNumber

- public string BankName
- public string CardCVV
- public string CardExpiry
- public string CardNumber
- public string Description
- public string IFSCCode
- public string PaymentMethod
- public string Upild
- public string WalletEmail
- public string WalletName
- public string WalletPhoneNumber

class PaymentResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/PaymentResponse.cs

Modifiers: public

Properties (7):

- public bool Success
- public decimal Amount
- public string Message
- public string OrderId
- public string PaymentStatus
- public string PaymentUrl
- public string TransactionId

class PayrollDashboardResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/PayrollDashboardResponse.cs

Modifiers: public

Properties (9):

- public decimal? TotalDeductions
- public decimal? TotalGrossSalary
- public decimal? TotalNetSalary
- public decimal? TotalPayout
- public int? OnHoldCount
- public int? PaidCount
- public int? PendingApprovals
- public int? TotalEmployeesProcessed
- public string? ActiveCycleName

class PayrollSummaryResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/PayrollSummaryResponse.cs

Modifiers: public

Properties (6):

- public decimal TotalDeductions
- public decimal TotalGross
- public decimal TotalNetPay
- public int CycleId
- public string? CycleName
- public string? Status

class PendingUserViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/PendingUserViewModel.cs

Modifiers: public

Properties (13):

- public DateTime CreatedDate
- public bool IsActive
- public int Id
- public int? DepartmentId
- public int? EmployeeId
- public string Email
- public string RegistrationStatus
- public string Username
- public string? AssignedRoles
- public string? DepartmentName
- public string? EmployeeName
- public string? FullName
- public string? PhoneNumber

class ProfileViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ProfileViewModel.cs

Modifiers: public

Properties (17):

- public DateTime CreatedDate
- public DateTime? DateOfBirth
- public DateTime? LastLoginDate
- public List<string> Permissions
- public List<string> Roles
- public bool EmailConfirmed
- public bool IsActive
- public int Id
- public string Email
- public string FirstName
- public string FullName
- public string LastName
- public string Username
- public string? Address
- public string? PhoneNumber
- public string? ProfilePicture
- public string? ProfilePictureUrl

Fields (3):

- public bool HasProfilePicture
- public string Initials
- public string ProfilePictureDisplay

class RegisterModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/RegisterModel.cs

Modifiers: public

Properties (8):

- public int? RoleId

- public string ConfirmPassword
- public string Email
- public string FirstName
- public string LastName
- public string Password
- public string Username
- public string? PhoneNumber

class ResetPasswordViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/ResetPasswordViewModel.cs

Modifiers: public

Properties (4):

- public string ConfirmPassword
- public string Email
- public string NewPassword
- public string Token

class RoleInfoViewModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/RoleInfoViewModel.cs

Modifiers: public

Properties (3):

- public int Id
- public string Name
- public string? Description

class SalaryComponentItem (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SalaryComponentItem.cs

Modifiers: public

Properties (2):

- public decimal Amount
- public string ComponentName

class SalarySlipResponse (EmployeeManagement.UI.Models.DTOs)

File: EmployeeManagement.UI/Models/SalarySlipResponse.cs

Modifiers: public

Properties (18):

- public DateTime? EmailSentDate
- public bool EmailSent
- public decimal GrossSalary
- public decimal NetSalary
- public decimal TotalDeductions
- public int AbsentDays
- public int Id
- public int LeaveDays
- public int SlipId
- public int WorkingDays
- public int Year
- public string? DepartmentName
- public string? MonthName
- public string? NetSalaryInWords

- public string? PAN
- public string? PFNumber
- public string? SlipNumber
- public string? Status

class SalaryStructureResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SalaryStructureResponse.cs

Modifiers: public

Properties (12):

- public DateTime? EffectiveDate
- public DateTime? EndDate
- public List<SalaryComponentItem> Deductions
- public List<SalaryComponentItem> Earnings
- public decimal? AnnualCTC
- public decimal? GrossSalary
- public decimal? NetSalary
- public decimal? TotalDeductions
- public int EmployeeId
- public string EmployeeCode
- public string EmployeeName
- public string TemplateName

class SalaryTemplate (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SalaryTemplate.cs

Modifiers: public

Properties (7):

- public DateTime CreatedDate
- public bool IsActive
- public int Id
- public int? CreatedBy
- public string TemplateName
- public string? Description
- public string? TemplateCode

class SalaryTemplateComponent (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SalaryTemplateComponent.cs

Modifiers: public

Properties (11):

- public bool IsActive
- public decimal? DefaultAmount
- public decimal? DefaultPercentage
- public int ComponentId
- public int DisplayOrder
- public int Id
- public int TemplateId
- public string AmountOrPercentage
- public string ComponentName
- public string ComponentType
- public string? CalculationType

class SalaryTemplateResponse (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SalaryTemplateResponse.cs

Modifiers: public

Properties (2):

- public int Id
- public string TemplateName

class SingleEndpointRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/SingleEndpointRequest.cs

Modifiers: public

Properties (3):

- public string Url
- public string? Body
- public string? Method

class Student (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/Student.cs

Modifiers: public

Properties (13):

- public DateTime JoiningDate
- public int Id
- public int? Age
- public string Class
- public string FirstName
- public string FullName
- public string LastName
- public string StudentId
- public string? BatchTime
- public string? Email
- public string? PassportPhotoPath
- public string? PhoneNumber
- public string? Subjects

class UpdateProfileRequest (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/UpdateProfileRequest.cs

Modifiers: public

Properties (7):

- public DateTime? DateOfBirth
- public int Id
- public string Email
- public string FirstName
- public string LastName
- public string? Address
- public string? PhoneNumber

class UserModel (EmployeeManagement.UI.Models)

File: EmployeeManagement.UI/Models/UserModel.cs

Modifiers: public

Properties (5):

- public int Id

- public string Email
- public string Provider
- public string Token
- public string Username

class ApiService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/ApiService.cs

Modifiers: public

Inherits / implements: IApiService

Constructors (1):

- public ApiService(IHttpClientFactory httpClientFactory, ILogger<ApiService> logger)

interface IApiService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/IApiService.cs

Modifiers: public

No public/internal/protected members discovered by parser.

interface IPaymentService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/IPaymentService.cs

Modifiers: public

No public/internal/protected members discovered by parser.

interface IStudentService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/IStudentService.cs

Modifiers: public

No public/internal/protected members discovered by parser.

interface ITokenService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/ITokenService.cs

Modifiers: public

No public/internal/protected members discovered by parser.

class PaymentService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/PaymentService.cs

Modifiers: public

Inherits / implements: IPaymentService

Constructors (1):

- public PaymentService(HttpClient httpClient, ITokenService tokenService, ILogger<PaymentService> logger)

Methods (4):

- public async Task<List<Payment>> GetEmployeePaymentsAsync(int employeeId)
- public async Task<PaymentResponse> GetPaymentStatusAsync(string orderId)
- public async Task<PaymentResponse> InitiatePaymentAsync(PaymentRequest request)
- public async Task<decimal> GetTotalPaymentsAsync(int employeeId)

class StudentService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/StudentService.cs

Modifiers: public

Methods (1):

- public async Task UpdateStudentPhotoAsync(int studentId, string photoPath)

class TokenService (EmployeeManagement.UI.Services)

File: EmployeeManagement.UI/Services/TokenService.cs

Modifiers: public

Inherits / implements: ITokenService

Constructors (1):

- public TokenService(IHttpContextAccessor httpContextAccessor)

Methods (6):

- public async Task RemoveTokenAsync()
- public async Task SetRefreshTokenAsync(string token)
- public async Task SetTokenAsync(string token)
- public async Task<string> GetRefreshTokenAsync()
- public async Task<string> GetTokenAsync()
- public bool IsTokenExpired(string token)

class ActionCountViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/ActionCountViewModel.cs

Modifiers: public

Properties (2):

- public int Count
- public string Action

class AdminLeaveDashboardViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/AdminLeaveDashboardViewModel.cs

Modifiers: public

Properties (17):

- public List<DepartmentBreakdownViewModel> DepartmentData
- public List<LeaveTypeBreakdownViewModel> LeaveTypeData
- public List<MonthlyBreakdownViewModel> MonthlyData
- public List<RecentLeaveItemViewModel> RecentRequests
- public List<TodayLeaveItemViewModel> OnLeaveTodayList
- public decimal TotalApprovedDays
- public int ApprovedRequests

- public string? LeaveTypeCode
- public string? LeaveTypeName
- public string? Remarks

class LeaveTypeBreakdownViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/LeaveTypeBreakdownViewModel.cs

Modifiers: public

Properties (5):

- public decimal ApprovedDays
- public decimal PendingDays
- public int TotalRequests
- public string LeaveTypeCode
- public string LeaveTypeName

class LeaveTypeViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/LeaveTypeViewModel.cs

Modifiers: public

Properties (10):

- public bool IsActive
- public bool IsCarryForward
- public bool IsPaid
- public int DefaultDays
- public int Id
- public int MaxCarryForward
- public int MaxDays
- public string Code
- public string Name
- public string? Description

class MonthlyBreakdownViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/MonthlyBreakdownViewModel.cs

Modifiers: public

Properties (7):

- public decimal ApprovedDays
- public int Approved
- public int MonthNumber
- public int Pending
- public int Rejected
- public int TotalRequests
- public string MonthName

class MonthlyLeaveReportViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/MonthlyLeaveReportViewModel.cs

Modifiers: public

Properties (10):

- public decimal ApprovedDays
- public decimal CancelledDays
- public decimal PendingDays
- public decimal RejectedDays
- public decimal TotalDays
- public int EmployeeId
- public int TotalRequests
- public string EmployeeName
- public string LeaveTypeName
- public string? DepartmentName

class RecentLeaveItemViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/RecentLeaveItemViewModel.cs

Modifiers: public

Properties (12):

- public DateTime AppliedDate
- public DateTime EndDate
- public DateTime StartDate
- public decimal TotalDays

- public int EmployeeId
- public int Id
- public string EmployeeName
- public string LeaveTypeCode
- public string LeaveTypeName
- public string Status
- public string? DepartmentName
- public string? Reason

class RegisterViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/RegisterViewModel.cs

Modifiers: public

Properties (4):

- public string ConfirmPassword
- public string Email
- public string Password
- public string Username

class StudentViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/StudentViewModel.cs

Modifiers: public

Properties (14):

- public DateTime JoiningDate
- public bool IsActive
- public int Id
- public int? Age
- public string Class
- public string FirstName
- public string FullName
- public string LastName
- public string StudentId
- public string? BatchTime
- public string? Email
- public string? PassportPhotoPath
- public string? PhoneNumber
- public string? Subjects

class TodayLeavelItemViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/TodayLeavelItemViewModel.cs

Modifiers: public

Properties (6):

- public DateTime EndDate
- public DateTime StartDate
- public decimal TotalDays
- public string EmployeeName
- public string LeaveTypeName
- public string? DepartmentName

class UserApprovalPageViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/UserApprovalPageViewModel.cs

Modifiers: public

Properties (7):

- public List<DepartmentViewModel>? Departments
- public List<PendingUserViewModel> AllUsers
- public List<PendingUserViewModel> PendingUsers
- public List<RoleInfoViewModel> Roles
- public int TotalApproved
- public int TotalPending
- public int TotalRejected

class UserCountViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/UserCountViewModel.cs

Modifiers: public

Properties (2):

- public int Count
- public string Username

class UserViewModel (EmployeeManagement.UI.ViewModels)

File: EmployeeManagement.UI/ViewModels/UserViewModel.cs

Modifiers: public

Properties (12):

- public DateTime? CreatedAt
- public DateTime? LastLoginAt
- public bool IsActive
- public int Id
- public int? RoleId
- public string Username
- public string? Email
- public string? FirstName
- public string? LastName
- public string? PhoneNumber
- public string? ProfilePicture
- public string? RoleName

EmployeeManagement2

interface ITokenService (EmployeeManagement.UI.Services)

File: ITokenService.cs

Modifiers: public

No public/internal/protected members discovered by parser.

class PaymentController (EmployeeManagement.UI.Controllers)

File: PaymentController.cs

Modifiers: public

Inherits / implements: Controller

Attributes: Authorize

Constructors (1):

- public PaymentController(IPaymentService paymentService, ILogger<PaymentController> logger)

Methods (5):

- `public IActionResult Failure(string orderId)`
- `public IActionResult InitiatePayment(int? employeeId)`
- `public async Task<IActionResult> Index(int employeeId)`
- `public async Task<IActionResult> InitiatePayment(PaymentRequest request)`
- `public async Task<IActionResult> Success(string orderId)`
